Gathering Information for a Web Page on Nigeria

Follow these steps to learn about Nigeria’s three regions. You will use the information you gather to design a website on Nigeria.

**Step 1:** Get a Regions of Nigeria Card from your teacher. Read the section of Lesson 22 that matches the region on the card (northern, western, or eastern).

**Step 2:** In your Interactive Student Notebook, complete the row of the table for your region.

**Step 3:** Take your notebook to your teacher to make sure you have correctly recorded all of the information for the region. If you have, go on to Step 4. If not, go back to Step 2.

**Step 4:** Go to the graphics wall with your partner. At each of the four stations, determine which photograph was taken in the region you are studying. Write the letter of that photograph in the box for the appropriate topic in that region.

**Step 5:** Get a new Regions of Nigeria Card, and repeat Steps 2–4. As you work on new regions, you might need to review the photographs you chose for previous regions. You might change your mind about the region in which a particular photograph belongs.

**Step 6:** When you’ve completed the notebook for all three regions, have your teacher check that you chose the correct photos.
